

# Protect your Business & Clients with Legal Practice Services

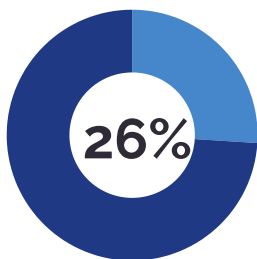

**Brightly's Legal Practice Services provide COVID-19 information to help keep employees and clients safe.**

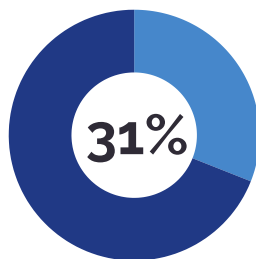

To help protect vital information are specialized cyber advocacy, assessments, protocols, training and tools to help law firms enhance their cyber practices and defenses.

Between case record management, the need for robust client privacy, and the use of often-vulnerable software applications, law firms are among the most at-risk businesses to phishing and ransomware attacks.

By making a holistic assessment of your firm's cyber risks and active defenses, we help you significantly decrease your threat surface for cyber attack. We examine multiple sources for breach — human error, technology, processes, premises and more — enabling a cyber strategy that mitigates those risks.

**26% of attorneys** reported to the ABA that their firm had experienced a cyber breach

**31% of attorneys** say that their firm has an incident response plan in place

## COVID-19 Services

This global pandemic has fundamentally changed operating models around the world. Our COVID-19 Commercial and Personal services help law firm clients adapt to this new normal with unbiased and vetted information resources that support businesses with newly-remote workforces and operating models.

## Cyber Education Tools

Cyber training models and simulations for attorneys and staff that cover timely practices for protecting essential client data.

## Record Management

Defined protocols and procedures to ensure all digital and paper case files and client records are handled and disposed of properly.

## Safe Video Conferencing

One of most secure video conferencing solutions in the world, built to prioritize safety and privacy.

## Office 365 Safety

Guidance to help attorneys and staff guard against cyber vulnerabilities in standard software, including Office 365.
